Mauve Chalk

Frag 31 Michelangelo Nabuk is a velour-grain leather with a marked writing effect that creates the characteristic appearance of nubuck. A pronounced sensation of softness and warmth distinguish this leather, with its pleasurable velvety feel. Surface markings, grain defects and minor blemishes of various kinds are typical of this kind of product, emphasising its natural origins. It has a quality that comes

from selection of the best European hides, subsequently enhanced by tanning and processing performed entirely in Italy. A perfect material for prestige products in exclusive contexts. Its particular characteristics mean that it may be damaged by exposure to direct sunlight or heat sources, or stained by spilt liquids.

Thickness: 1,3 mm
Leather type: European bovine leather
Tanning: Chromium salt (mineral)

Dyeing: Through dying
Finishing: Not finished
Final look: Smooth nabuk
